

Center for Genomic Pathology Laboratory

The Center for Genomic Pathology Laboratory provides expert histology and pathology services on a recharge basis. We provide tissue processing/sectioning, routine and special tissue staining, immunohistochemistry, whole slide scanning, database hosting, **help with** quantitative image analysis and pathology consulting services. Please see the following list for individual rates:

The CGPL laboratory is currently undergoing a rate review. We are projecting increases to our rates which may take effect as soon as February 1, 2019. Existing estimates/orders will honor current pricing in place. We will post the new rates as soon as we have campus approval. Please let us know if you have any questions.
